Art Unit: 1652

According to 37 CFR 1.821(b and c), applicant must include the sequence of I_kB_α in the CRF and written sequence disclosure since specific residues, i.e. 32 and 36, of this sequence are mentioned in the instant pending claims. Since the examination could be examined without this disclosure this has been done, however this sequence must be included in the specification.

Applicants argue that the sequence is well known in the art and that since only two residues are mentioned in the claims, a sequence disclosure is not required. There would be a problem with written description of the invention if the sequence was not disclosed in the application, even though it was well known. Because particular residues of the sequence of I_kB_α are referred to in the claims, the sequence must be disclosed. Perhaps the examiner should have done a written description rejection, but when the sequence rules were first instigated we were told that we should not do any rejections over the sequence rules but should rather set out the requirement and require compliance.

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-7 of U.S.

Art Unit: 1652

Patent No. 6,107,073. It is noted that applicant has offered to "consider filing a terminal disclaimer if claims deemed to be conflicting with claims 1-7 of U.S. Patent No. 6,107,073 are indicated as being allowable".

The examiner has read applicant's argument concerning the 35 USC § 112 scope rejection and that rejection is hereby dropped.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
